

STATE OF MOBILE 2024

The Industry's Leading Report

1 AI is Everywhere

Generative AI Chatbots and Art Generators dominated attention. But AI functionality is ubiquitous across nearly every app industry.

[Learn More >](#)

2 Social is the Battleground for \$\$

Consumers are shifting their spending habits. Popularized by TikTok, they are opting to spend directly in app via 'tips' to their favorite content creators, opening the door for subscriptions and IAPs.

[Learn More >](#)

3 Mobile Goes IRL

Demand for revenge travel, Swiftie and Bey-Hive fans, and live sports booms — consumers seek real life experiences... but always with their phones in tow.

[Learn More >](#)

4 Non-Gaming Apps Power Spending Rebound

Non-gaming apps underpin mobile growth. Up 11% YoY, consumers can't live without streaming, dating and User Generated Content (UGC).

[Learn More >](#)

5 Mobile Gaming Growth Lags, But Still Leads Gaming Industry

Demand remains steady. App store spend dips slightly. Market is bolstered by new releases and APAC publishers making inroads in western markets, similar to the ecommerce sector with the rise of Temu & SHEIN.

Top Performers by Mobile Performance Score

Mobile Performance Score is the industry's first mobile scoring system that's like a credit score, but for apps.

Get an executive overview on desktop or on the [Pulse iOS app](#).

Track Trending apps by their MPS within your genre:

Top Performer for Genre: < Apps | Entertainment >

Rank	App Name	Overall MPS	Weekly Change
1	 Kwai	 99	-
2	 Max: Stream HBO, TV, & Movies	 99	-
3	 TikTok	 99	-
4	 Star+	 98	+1
5	 Spotify	 98	-

Compare apps to see each quadrant's performance by hovering over them. Apps may have the same MPS score, but their quadrant score may be different:

Macro Mobile Trends

A mobile-centric world: app usage at an all time high. While spend in games feels the squeeze from inflation, app services buck recessionary headwinds.

Consumers are increasingly spending more time in apps, creating new opportunities for brands to build direct relationships with customers. Marketers who invest in developing seamless app experiences and advanced app solutions are meeting consumer expectations and driving ROI for their businesses.

Mike Holtgrewe

Head of Sales, Apps

Google

Consumers in Mobile-First Markets Spend More Than 5 Hours a Day on Mobile

Across the top 10 markets analyzed, the weighted average surpassed 5 hours in 2023 — up 6% from 2022 — to reach a new high.

Users in Indonesia surpassed 6 hours per day, while four other markets including Thailand, Argentina, Saudi Arabia, and Brazil surpassed 5 hours per day in mobile apps in 2023.

Time spent grew the fastest since 2020 in Japan, Australia and Canada at 18%, 16% and 16%.

MACRO MOBILE TRENDS

Consumer Spend Bounces Back While Time Spent Growth Continues

After declining 2% YoY in 2022, global consumer spend bounced back in 2023 up 3%. South Korea, Brazil, Mexico and Turkey all exceeded 25% YoY growth in 2023.

Meanwhile, downloads growth stalled at 1% YoY. Bangladesh has emerged as one of the fastest growing markets.

Time spent grew 10% YoY. Consumers in Pakistan (#10 by time spent), South Africa (#19) and Vietnam (#9) grew by 14%, 13% and 12% respectively.

MACRO MOBILE TRENDS

All Eyes On Mobile: Ad Spend Set to Fly Past \$400B in 2024

Attention marketers: Mobile will continue to take a larger share of the advertising wallet as more time than ever before is spent in apps. Total hours will reach 5.1 trillion in 2022 on Android phones alone. Ad spend growth will bounce back a bit from the slower growth in 2023, through it will remain below the rates seen between 2019 and 2022.

Are videos the future of captivating your audience's attention? [YouTube](#) and [TikTok](#) continue to gain consumer attention and outpace to social networks by average time spent per user.

Plan with confidence:
Read our [5 Mobile App Predictions for 2024](#).

First Time, Then Money: App Spend Climbs During Disposable Income Squeeze as Mobile Takes a Larger Share of Wallet

Games spend is closely tied to disposable income and took a hit in 2022 and 2023 as a result. Apps — which could represent more 'need-to-have' services, prove more resilient and mirror consumer behavior more similar to how people treat their cable bills, especially as consumers become more comfortable paying on mobile.

Games Consumer Spend Growth vs Disposable Income Growth Index

Apps Consumer Spend Growth vs Disposable Income Growth Index

Source: data.ai Intelligence and OECD | Note: Consumer Spend across iOS, Google Play; Spend is gross — inclusive of any percent taken by the app stores. Disposable income growth and consumer spend growth are both indexed to Q1 2017. Household disposable income data from the Organisation for Economic Co-operation and Development (OECD) and available through Q2 2023.

Will Consumers Soon Spend More in Apps Than Games? More Than \$60 Billion Spent in Apps Excluding Games in 2023

Consumer spend outside of mobile gaming has skyrocketed during the past 10 years, climbing from less than \$3 billion in 2014 to \$64 billion in 2023.

What's driving the growth? Entertainment, Social Media and Utility & Productivity led the way in 2023 as every single genre grew YoY.

Yearly Worldwide App Consumer Spend
2014 - 2023

Worldwide Consumer Spend Growth by App Genre
iOS and Google Play only: 2023 vs. 2022

Source: data.ai Intelligence | Note: Consumer Spend across iOS & Google Play and third-party Android stores in China; App genre breakdown includes iOS and Google Play only. Spend is gross — inclusive of any percent taken by the app stores. Based on App IQ Taxonomy as of Jan 4, 2024.

Top 20 Global App Subgenres by Downloads in 2023

Source: data.ai Intelligence | Note: Among non-gaming apps; Downloads and spend across iOS & Google Play and China is iOS only. Time spent is Android phones only; Spend is gross — inclusive of any percent taken by the app stores; Based on App IQ primary categorization as of Jan 4, 2024

MACRO MOBILE TRENDS

Utility & Productivity Drives Downloads with a Focus on Privacy

VPN Service & Web Accelerator apps took the lead as the top subgenre with 42% year-over-year growth. This included 50% growth in top markets like India and the United States.

Outside of Utility & Productivity, E-Commerce and Over-the-Top (OTT) apps were among the market leaders. E-Commerce ranked #3 by downloads and top 10 by time spent, while OTT also led the way for consumer spend.

Navigate macroeconomic headwinds: Spot high-growth markets on a weekly basis with a data.ai account. Drill down deeper with our [App IQ taxonomy](#) in each market.

MACRO MOBILE TRENDS

Consumers Continue to Pay for Video Streaming on Mobile

Video-based subgenres dominated the leaderboard by global consumer spend in 2023, including the top subgenre, Over-the-Top (OTT). Subgenres including Short Videos, Video Sharing and Live Sports all saw double-digit growth compared to 2022.

Apps across the different app genres have figured out how to successfully monetize on mobile. Nine different genres were represented among the top 20 subgenres in 2023.

Top 20 Global App Subgenres by Time Spent (Hours) in 2023

MACRO MOBILE TRENDS

Monopoly on Time: Social Media and Entertainment

Four of the top five subgenres by time spent were in the Entertainment or Social Media genres. This is notable — the top five subgenres accounted for more than two-thirds of total time spent on mobile apps.

Media Sharing Networks had the strongest growth at 35% year-over-year with top apps including Instagram and Snapchat. Time spent for traditional Social Networks was roughly flat compared to 2022.

The 2023 \$1 Billion Club

More than 1,500 apps and games generated over \$10 million annually in 2023.

219 surpassed \$100 million and 13 surpassed \$1 billion annually.

Economic headwinds disproportionately impacted top games: The number of games with more than \$10 million in consumer spend bounced back, roughly even with the previous high in 2021. The number of games earning \$100 million or \$1 billion have yet to reach the highs from 2021.

Learn how to isolate changes in the competitive landscape to make informed strategic decisions specific to your business.

Number of Apps Surpassing Annual Global Consumer Spend

Source: data.ai Intelligence | Note: Consumer Spend across iOS, Google Play, iOS only for China; Spend is gross — inclusive of any percent taken by the app stores

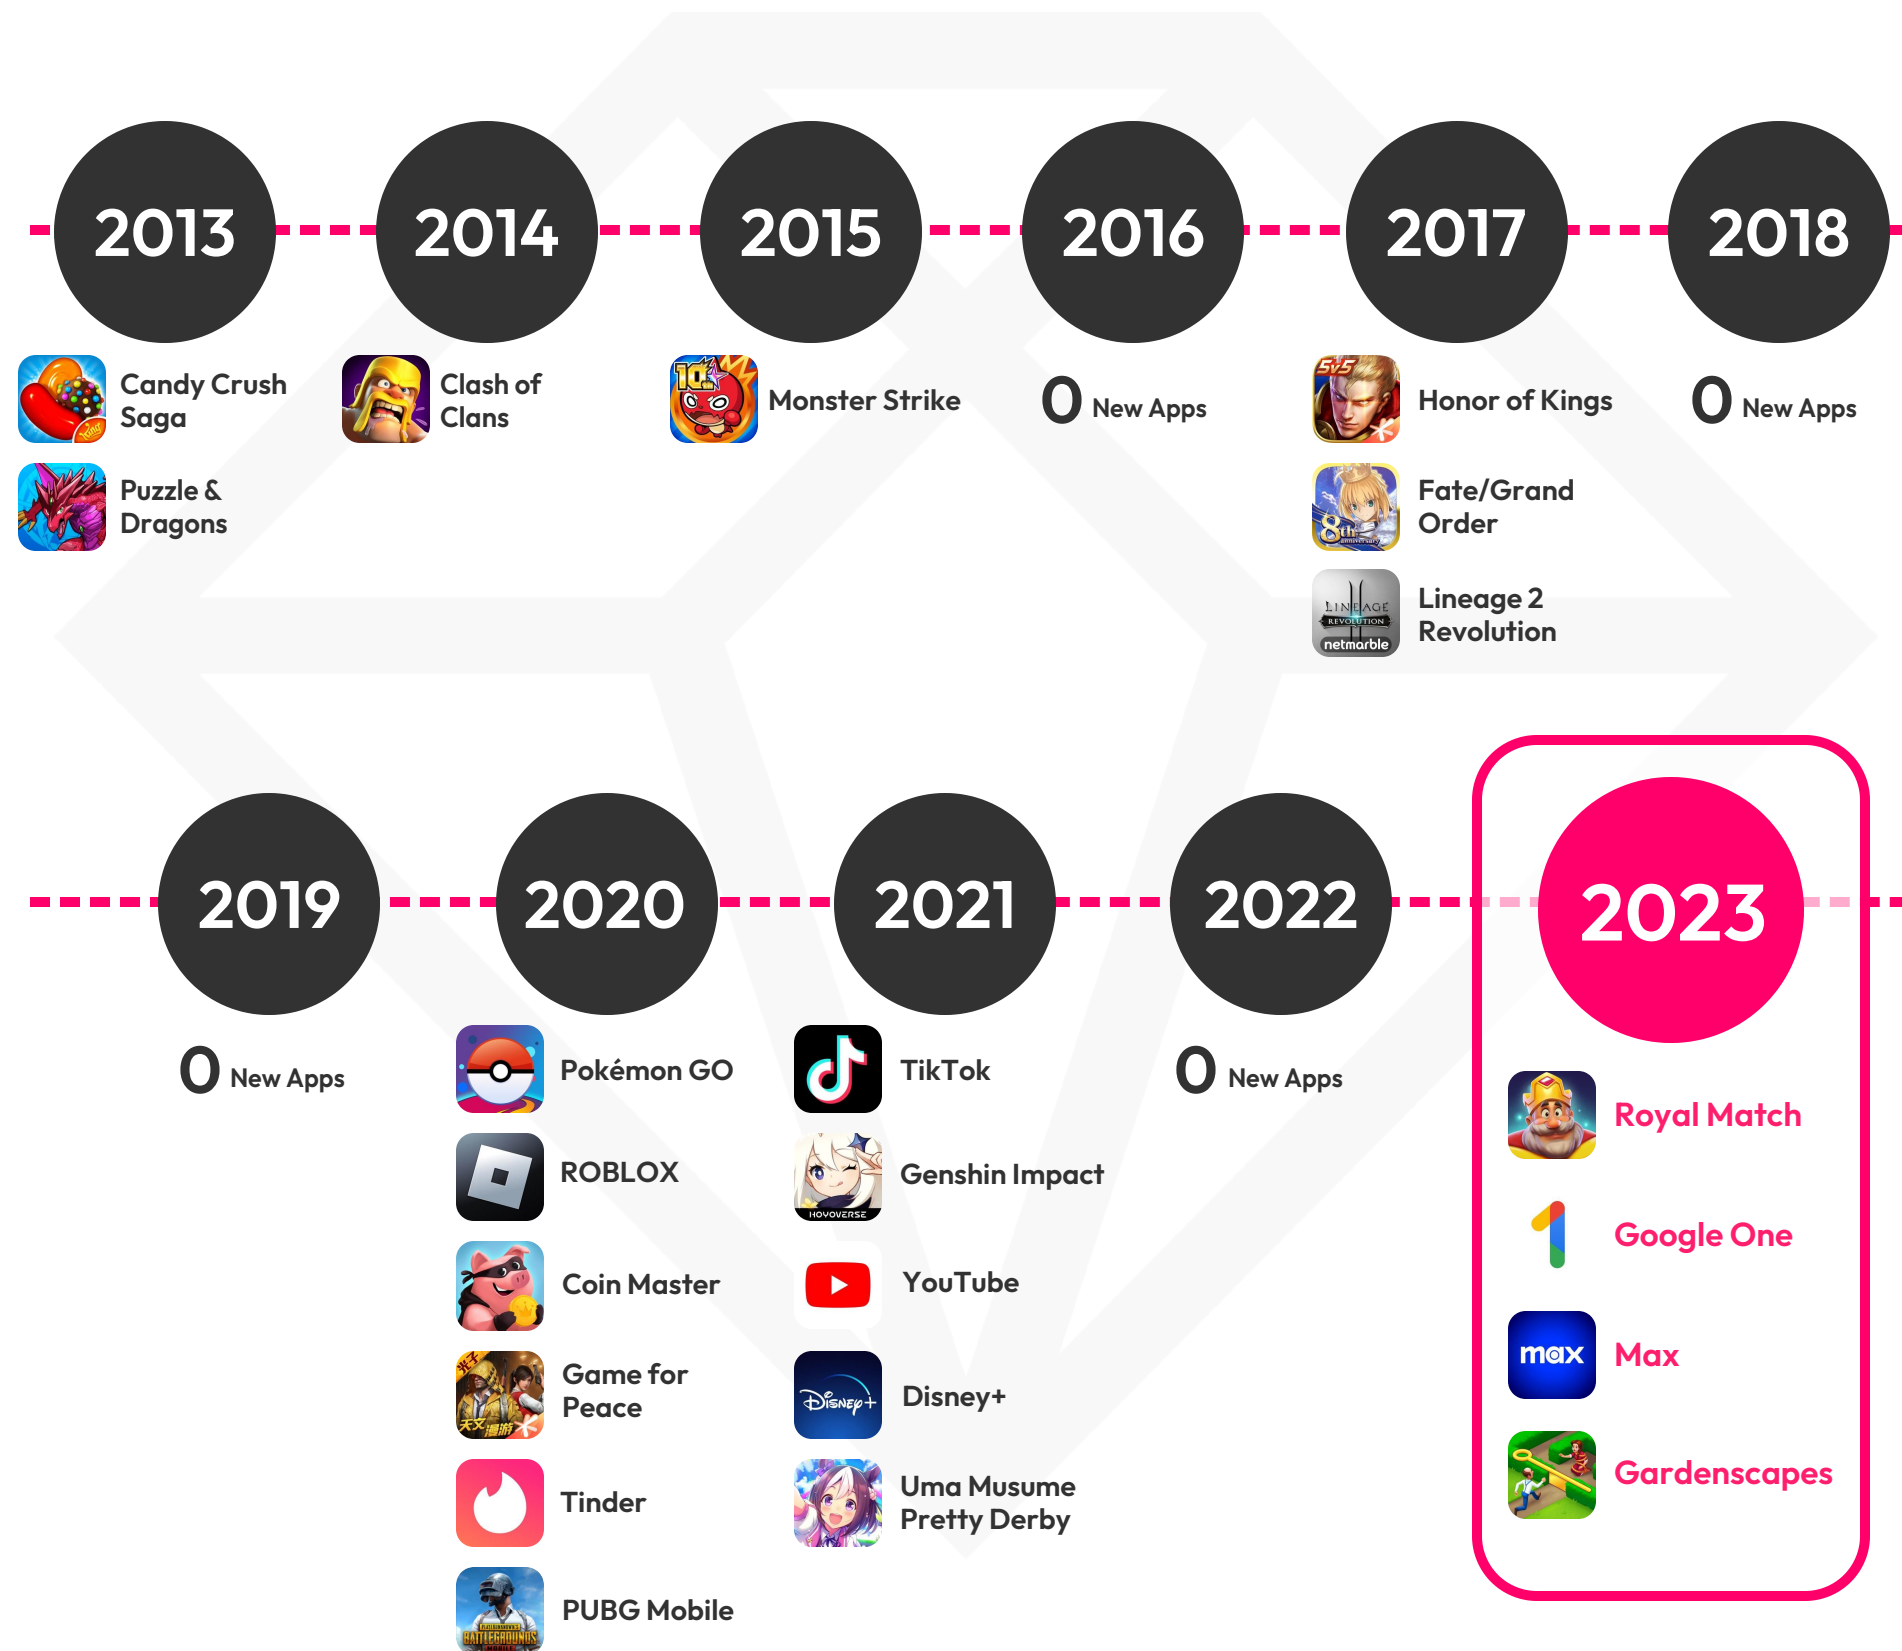

Meet the New Entrants to the \$1 Billion Club in 2023

Four new apps joined the annual \$1 billion club in 2023 with Royal Match leading the way. This was a strong bounce back after no apps entered the club in 2022.

No non-game app reached \$1 billion in annual global consumer spend until Tinder in 2020. Five more apps have reached this milestone since, including two new additions this year (Google One and Max).

How did these new entrants monetize so effectively? [data.ai's In-App Purchase SKU](#) data reveals which in-app purchases drove these breakout performances.

Generative AI App Weekly Downloads by Subgenre

Generative AI App Weekly Consumer Spend by Subgenre

Source: data.ai Intelligence | Note: Downloads and consumer spend across iOS, Google Play; China is iOS only. Generative AI apps are classified using data.ai's App IQ taxonomy.

Generative AI is the Breakout Genre of 2023

Generative AI, data.ai's latest addition to its App IQ taxonomy, emerged as one of the fastest growing genres of 2023. AI Chatbot apps really took off in the later part of the year with the launches of [ChatGPT](#) and [Character AI](#) and adoption has remained strong since.

Consumer spend also continued to climb throughout 2023 after huge growth earlier in the year. Many top apps like ChatGPT include subscription offerings to unlock additional features.

The AI popularity was fairly global, though the genre did not rank among the top five breakout genres in several Asian and Middle Eastern market including China, Japan, Saudi Arabia, and Turkey.

Find out which apps are driving this growth with [Top Apps](#), powered by data.ai's App IQ

Not Just for Chatting: Apps Across Verticals Find Success with AI

A cohort of 20 top apps that recently added AI features outperformed the market in 2023 with 11% YoY growth. The positive results were also well distributed — 13 of the 20 (65%) saw positive growth.

AI has made its way across the mobile spectrum, from Social ([Snapchat](#)) to Education ([Duolingo](#)) to Finance ([Wells Fargo](#)). In fact, these 20 apps represent eight different genres and 14 subgenres.

Check out how recent feature improvements affected an app's performance across all key metrics.

Source: data.ai Intelligence | Note: Cohort of select apps that have added AI features.

The AI Enthusiasm Hit Mobile in 2023 — and with Many More Apps Than Just ChatGPT

Thousands of apps flocked to the iOS App Store and Google Play store with ai-related solutions. More than 4,000 apps added "chatbot" to their app descriptions, and more than 3,500 added "gpt".

The majority of ai-related apps launched in 2023. For example, 2,500 apps launched in 2023 with "chatbot" in their description — nearly double the apps launched in the previous four years combined.

Gaming

Demand for games at all-time high, yet spending on in-game purchases cools.

data.ai offers market industry benchmarking and competitive insights that are an essential aid to companies that desire to be at the forefront. Complementing our own analytics, it offers side by side view of market data that affords us the opportunity to maintain a competitive edge, to remain innovative and to have the ability to pivot as the fast paced gaming market requires.

Matt Liu

Head of NetEase Games Overseas Publishing

Consumer Spend in Mobile Gaming Fell 2% in 2023 to \$107.3 Billion — Downloads Dipped to Around 88 Billion

In 2023, well known IP games such as Monopoly GO and EA SPORTS FC Mobile Soccer saw breakout success as mobile games are now capable of offering console-quality graphics and gameplay experiences.

Hit Open World RPG Genshin Impact continued to break new grounds, crossing \$4 Billion in all-time consumer spend in Q1 2023.

Puzzle and Hypercasual games like Block Blast Adventure Master and Attack Hole were key download drivers, but 2023 saw some surprise hits such as Avatar Life Simulation game Gacha Life 2, and Party Royale game Eggy Party, making major gains in downloads and usage.

Monitor market movements day-by-day with a [data.ai account](#) to get the scoop on the latest shifts and emerging opportunities.

Top 20 Global Game Subgenres by Downloads in 2023

GAMING

Hypercasual Games Continue to Drive the Largest Share of Downloads

Hypercasual games as a genre have seen a boom in demand. As the market becomes increasingly competitive, we expect more hypercasual games to evolve in terms of blending mechanics to create deeper engagement.

Hypercasual games have been a great user acquisition funnel for many publishers and now we expect the focus to shift partially to building depth and engagement since they have acquired a significant footprint.

Innovative Genres such as Avatar Life (Gacha Life 2) and Party Royale (Eggy Party) are poised to disrupt incumbent market dominance.

Remain ahead of competitors with market specific insights segmented by sub-genre, using data.ai's unique Game IQ taxonomy.

GAMING

Strategy and RPG are Among the Most Successful Genres for Game Monetization

Casino genres have been the leading genre in markets including the United States and Canada, but in recent years Strategy and RPG Games have encroached on market share. Top genres such as 4x March-Battle, MMORPG and Battle Royale tend to feature online multiplayer mechanics — indicating an appetite for connection and social experiences exists across the gaming spectrum.

Cross-play features are becoming increasingly prominent in the top games — the ability to access the same game progress across devices (whether on mobile or console, for instance) appears to be on the rise, as is playing against players using different platform versions of the same game.

Navigate macroeconomic headwinds: Spot high-growth markets on a weekly basis with a data.ai account. [Drill down deeper with our Game IQ taxonomy in each market.](#)

GAMING

Creative Sandbox and Genres with Online & Social Features Will Further Drive Global Gaming Time

We expect social and multiplayer gaming features to remain in high demand in 2024 as consumers seek to stay connected with family and friends, even as pandemic measures ease.

Mobile has enabled core games to become more 'casual' in nature given the device specs and user interface. Yet, mobile phones are powerful enough to stand up to the 'core' game experience and enable cross-platform play.

Connected games are the biggest driver of overall consumer spend in mobile games and we predict will be a key area of growth in 2024 and beyond.

FINANCE

Consumers Embrace Mobile for their Finance Needs from Banking to Payment

Mobile app adoption across top subgenres like Mobile Banking and Digital Wallets & Payment continued to climb as consumers continue to turn to their mobile devices more than ever for their finance needs.

Meanwhile, Personal Loans app adoption remained strong as economic headwinds continued in 2023. The prevalence is highly regional, however, with much of the growth driven by markets like India, Indonesia, and Mexico.

The dip in Cryptocurrency Trading leveled off in 2023 after seeing a pronounced downturn in 2022. Unsurprisingly, downloads tend to track with the turbulence in the cryptocurrency market.

Want to see which markets are emerging for each subgenre? [data.ai's Market Size](#) lets you keep up with the latest trends across the globe.

Know Your Market — Local Publishers Dominate their Mobile Finance Markets

Understanding each country's unique financial rules and regulations — plus the unique consumer needs for each market — gives local-based publishers a major leg up in the finance space.

The local advantage particularly strong in China, Japan, South Korea and the United States. Most markets have seen the share from outside publishers pick up a bit in recent years, though India and Indonesia are notable exceptions as their mobile industries thrive.

Find out which publishers are looking abroad with the Company HQ filter, part of data.ai's [Top Apps](#)

Inflation vs. Personal Loan Downloads

Correlation Between Inflation and Finance Subgenre Downloads Q1 2018 - Q3 2023

Source: data.ai Intelligence | Note: Downloads across iOS, Google Play; China is iOS only. Apps are classified using data.ai's App IQ taxonomy. Inflation is from the OECD.

FINANCE

Personal Loans is the Fastest Growing Subgenre as Inflation Remains High

While most subgenres saw downloads rise along with high inflation over the past few years, no subgenre saw a higher correlation than Personal Loans. The scale of the growth was also notable — global downloads for Personal Loans apps climbed more than 250% between 2020 and 2023, even outpacing Cryptocurrency's 238% growth over the same period.

Personal Loans downloads don't have the highest correlation with inflation in all markets, though it tends to be high throughout. In Europe, for example, Personal Loans apps saw strong growth even though gross totals for the subgenre remained quite low.

With more than 800,000 apps classified, data.ai's [App IQ taxonomy](#) gives you the power to dive deeper into the impacts of the global economy on the app ecosystem

Finance "Super Apps" Use Multiple Useful Features to Maintain Market Share

In a competitive mobile market, top finance apps have continued to add new features to incentivize customers turning to their app for all finance needs, from mobile banking to sending money to trading in crypto. Super apps have become particularly popular in China, with Alipay as a prime example.

data.ai's Feature Tags reveals that all of the top markets have at least one app with four or more of the features listed here, and several including the US, UK, China and Brazil have three or more such apps. These apps tend to be market leaders in the finance space. In fact, these super apps control more than 20% of the Finance monthly active user base in China (47%), the US (32%) and Argentina (24%).

Another component of data.ai's App IQ taxonomy is the feature tags – with 20 different features tagged specific to the Finance genre alone. Filter by different features to see what is helping apps stay on top.

RETAIL

Mobile Shopping Time Spent Remains Well Above Pre-Pandemic Levels

The economic headwinds, combined with a natural contraction from the huge mobile growth seen early in the pandemic, led to a slight dip in total time spent in Shopping apps. Total hours declined 1% year-over-year in 2023, though it was still up more than 25% compared to 2020.

While some of the largest retail markets like China and the United States saw a dip in time spent in 2023, other markets bucked this trend. The leaders by YoY growth were Brazil (+31%), Australia (+13%), and Mexico (+7%).

Top Apps by Breakout Downloads in 2023

RETAIL

The Retail Market is Heating Up: Temu Makes a Splash in 2023

Among mobile apps across all genres, only Threads gained more downloads in 2023 compared to 2022 than Temu. The e-commerce app from Chinese PDD Holdings used substantial advertising and low prices to attract new users and become a key player to watch.

E-Commerce apps also face competition from brick & mortar stores, which are capitalizing on the return to in-person shopping to boost mobile adoption. Supermarket & Convenience Store and Retailer Store apps saw year-over-year download growth at 9% and 7%, respectively, well ahead of E-Commerce's -7% annual growth.

For brick & mortar retailers, it is clear that failing to embrace a mobile shopping experience puts you at a disadvantage.

Temu's massive advertising push in 2023 propelled it to the top of the charts. data.ai customers can use [Download Channel](#) data to find out how paid vs. organic channels contributed to adoption.

Source: data.ai Intelligence | Note: Downloads across iOS, Google Play; China is iOS only. Shopping apps are classified using data.ai's App IQ taxonomy. Subgenres with less than 15,000 downloads in the prior year are excluded. Breakout apps are defined by gross download growth in 2023 compared to 2022.

Going Global: SHEIN and Temu Break into Markets Across the Globe

The United States has long been the home to some of the biggest retailers like [Amazon](#), [Walmart](#) and [eBay](#). However, the emergence of some Asia-based e-commerce platforms had contributed to the US losing market share over the past few years.

[Temu's](#) massive global launch in 2023 helped China gain 3.4 percentage points in market share compared to 2020. Singapore-based [SHEIN](#) has also had a strong presence in recent years across top retail markets.

VIDEO STREAMING

The Streaming Battle: Strong Revenue Growth Suggests Market is not Oversaturated

Consumer spend in OTT (over-the-top) streaming apps climbed 13% globally in 2023 to surpass \$8 billion in 2023, an slight acceleration from the 12% growth in 2022.

This growth came even as the market became a little less competitive. The top five streamers combined for nearly 50% of the market in 2023, up from 45% in 2022. Disney+, the top app each of the past four years, gained even more market share as well.

Some countries have become more competitive in recent years as apps like Disney+ and Max expand into new markets. Brazil, for example, has seen consumer spend grow more than 230% since 2020 as apps like Max, Disney+, Crunchyroll, and Star+ joined the market leader Globo Play.

Disney+ has found success across the globe, earning at least \$1 million in consumer spend in more than 50 different markets. [data.ai customers can see the full breakdown of Disney+'s performance here.](#)

VIDEO STREAMING

Streaming Services Adjust Subscription Offerings for Cost-Conscious Customers

Increasing competition from the abundance of streaming options has prompted top apps to adjust their prices to changing consumer demands.

The share of US consumer spend from in-app purchases priced less than \$15 has climbed 7 percentage points since the start of 2022. While top apps have gradually increased prices over time, tighter budgets for many consumers in 2023 have forced apps to get creative with their monetization.

Netflix added an ad-based option in late 2022, and Disney+ and Hulu are raising the monthly price of their ad-free options while leaving the ad-supported tier price unchanged.

Want to see how updated pricing or ad-supported options are impacting an app's revenue? data.ai's IAP SKU pulls back the curtain on revenue from individual IAPs.

Social

Disrupting social media: "tipping" content creators carves out social media monetization pathways outside of advertising.

In a market that is so saturated with multiple apps in every genre you need to articulate your differentiation and value. First and foremost, focus on the user. Build a platform that is focused primarily on your users and iterate on the features and benefits of that platform based off of the ones that are most used, most liked, most loved, so that the people you're bringing in then ultimately have higher retention rates and stick around and add value to your business overall.

David Lee

Head of Apps, Global Business Solutions - North America

SOCIAL

Time Spent in Social Apps Grows 9% in 2023

Time spent in social apps on Android phones shows no signs of slowing, climbing 9% in 2023 to more than 2.3 trillion hours.

Consumer spend growth also remained strong at 13% year-over-year to nearly \$9 billion in 2023. Top social platforms are continuing to unlock monetization strategies outside of advertising, with TikTok, the best app monetizer in the history of the app stores, as a prime example.

Global downloads, on the other hand, declined nearly 4%. This was still impressive as the category maintained most of the strong gains seen in 2022.

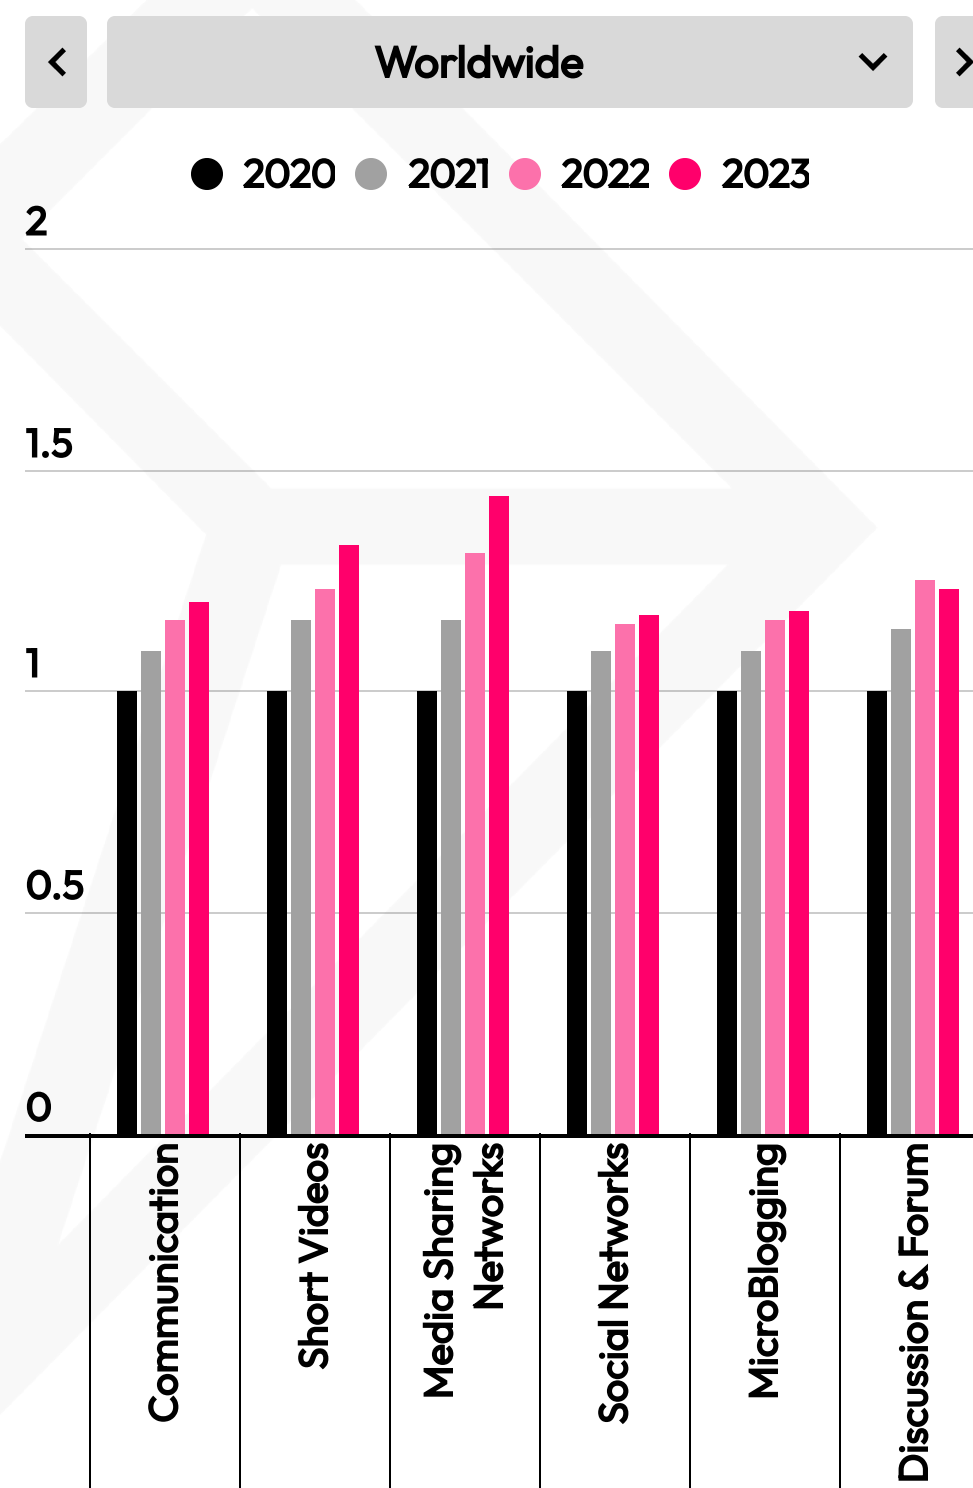

Need tips on how to keep up with the shift towards in-app purchase revenue for social apps? Check out our latest [Monetization Guide](#).

Average Annual Monthly Active Users for Social Apps by Subgenre

Annual Monthly Active Users Growth Indexed to 2020

SOCIAL

A New Normal? Social Apps See Headwinds in the US Despite Global Growth

Active user growth remained strong across Social subgenres in 2023. However, results for subgenres in some notable markets like the US, China and the UK was more mixed.

In the United States, for example, average monthly active users for Communication, Social Networks and MicroBlogging apps was below the levels in 2020, and Shorts Videos and Discussion & Forum apps also saw a year-over-year decline.

Mature mobile markets are seeing Social usage stabilize after the rapid increase caused by the start of the pandemic in 2020.

With 164 unique subgenres across 20 genres, data.ai's [App IQ taxonomy](#) gives you the granularity you need to analyze the latest trends in the market.

Source: data.ai Intelligence | Note: Monthly active users across iOS, Android. Social apps are classified using data.ai's App IQ taxonomy.

Are Visual-Focused Social Apps Making MicroBlogging Less Relevant?

X's struggles to keep its user-base have been well publicized in 2023. While this has prompted a number of competitors like Threads and Bluesky to launch in 2023, the ceiling for MicroBlogging's market is still in question with many mobile users preferring video-based platforms like TikTok.

Globally, the decline in X usage has been more than offset by growth from competitors like Threads. In the US, however, X competitors have yet to make up for the decline in X's user base and overall MicroBlogging usage declined slightly in 2023.

Keep track of our latest reports on Threads and other breakout apps on [our blog](#)

Watch TikTok's Rapid Climb to \$10 Billion — the First App to Ever Reach This Milestone

TikTok became the first app ever — including games — to reach \$10 billion in all-time consumer spend. This milestone seemed impossible only a few years ago. It took nearly 10 years for any non-game app to accumulate just \$1 billion in all-time consumer spend. TikTok is now surpassing \$1 billion in consumer spend each quarter.

TikTok unlocked the secret to monetization on mobile. The bulk of its in-app purchase revenue comes from coins which can be used to tip creators during live streams.

SOCIAL

Can Other Apps Capture TikTok's IAP Success?

It took a while for leading social platforms to expand from advertising as their only source of revenue on mobile. TikTok's success with tipping as well as the rise of the subscription model outside of mobile games has revealed the potential for in-app purchases to boost revenue. Consumer spend in Social apps nearly doubled between 2020 and 2023.

While TikTok's monetization mostly comes from one-time purchases, it is an outlier in this respect. Nearly all other top non-game monetizers rely heavily on subscriptions. Snapchat, for example, has found strong revenue growth with its Snapchat+ subscription.

Instagram, on the other hand, is attempting to replicate some of TikTok's magic with its Instagram Badges (similar to TikTok coins).

Want to see how well Instagram Badges are performing? data.ai customers can track the latest trends with IAP SKU

TikTok Monetization is Unparalleled

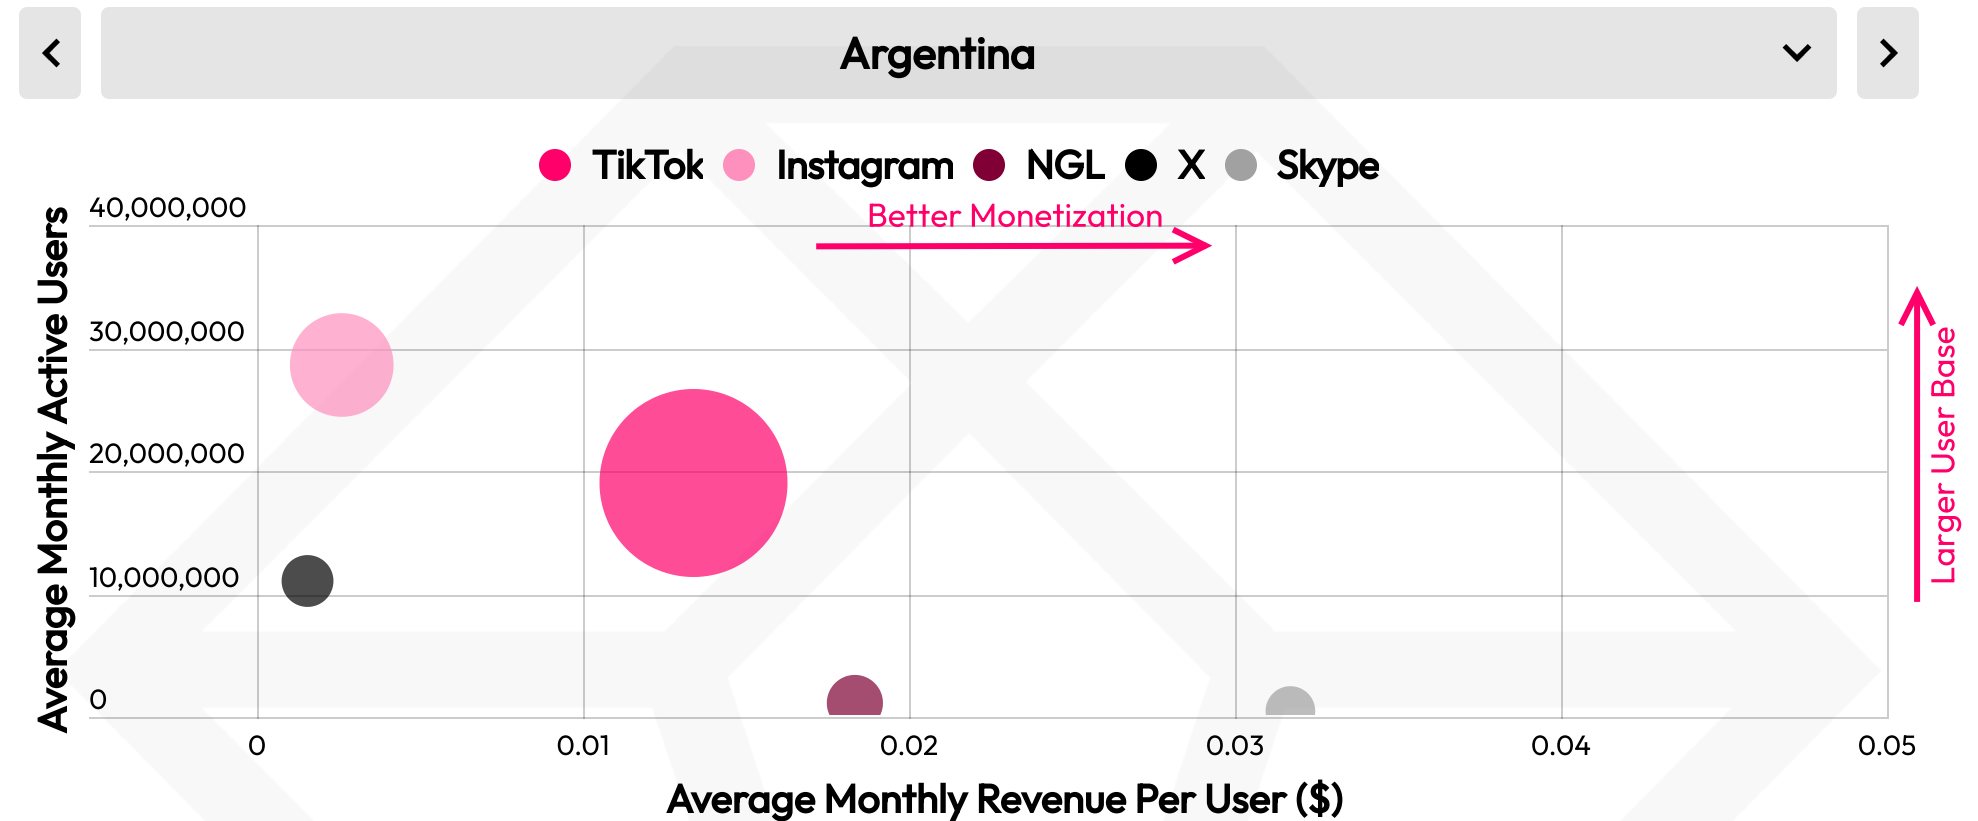

TikTok now earns more than \$1 per user in the United States, up from just 67 cents per user in 2022. Among the top five apps by total consumer spend, Discord ranks a distant second at 17 cents per user.

Some of the largest social media platforms in the US do show some promise in terms of monetizing through in-app purchases. Snapchat's consumed spend increased 5X on the back of its Snapchat+ subscription, and Instagram also saw rapid growth.

It'll be interesting to see how long these social platforms can maintain this strong monetization. In-app purchases are becoming a critical way for social platforms to mitigate the risks seen in the advertising market.

FOOD & DRINK

Quarterly Metrics for Food & Drink Subgenres by Market

Food & Drink Apps Soared During the Pandemic and Maintained the Gains Since

Quick-service restaurant (QSR) apps downloads climbed 50% between 2020 and 2023, with most of that growth coming since Q3 2022. QSR saw particularly strong adoption growth in China and the UK.

Food Delivery & Carryout remained the top subgenre by downloads and held an even larger gap by total sessions. While sessions have dropped off a bit from their peak in 2022, they remain well above pre-pandemic levels.

In the US, the QSR and Food Delivery & Carryout subgenres have diverged as in-person dining resumed, both in terms of new downloads and sessions. Top QSRs like McDonald's and Starbucks have made mobile apps an integral part of their strategy, including loyalty and rewards programs and in-app ordering options.

Combine [data.ai's Market Size](#) with its unique [App IQ taxonomy](#) to monitor the latest trends for Food & Drink apps

Mobile Apps Provide a Valuable Way to Boost Customer Loyalty

Like many retailers, QSR apps have found that improving the customer experience and adding rewards programs are great ways to keep customers coming back.

Discover which apps have been the best at adding users and increasing engagement. In the United States, for instance, McDonald's and Domino's were able to grow their user base and increase the number of sessions per user in 2023.

Discover how McDonald's is boosting engagement with features like a rewards program, mobile ordering and delivery

TRAVEL

Record-Breaking Travel Continued in 2023 with Downloads Up 20% Compared to 2019

It didn't take long for travel to come roaring back. By 2022, downloads were well-above pre-pandemic levels in most markets. Travel app downloads came roaring back after the COVID-19 pandemic in 2022.

With outsized growth coming from pent up demand following years of low travel, it was uncertain whether these gains would hold in 2023. The results are in and it is clear that the huge demand for travel was not a one-off.

Compared to the low in 2020, global downloads more than doubled by 2023 and time spent was up more than 85%.

[Check out our analysis](#) of the record-setting travel during the summer of 2023

Quarterly Travel App Downloads by Subgenre

TRAVEL

Travel is Back and Better Than Ever in 2023

Top subgenres all saw positive year-over-year growth, including 34% growth for Integrated Travel Service, 23% growth for Airline Apps and 16% growth for Hotel Booking.

The travel rebound was strong across the globe. In nearly all top markets, at least four of the top five subgenres had more downloads in 2023 than in pre-pandemic 2019.

Rideshare Outlook Improving But Struggling to Find Pre-Pandemic Success

Downloads and sessions for top rideshare apps like Uber have continued to improve from the low seen in 2020 during the pandemic. However, many apps have yet to reach the levels they had in January 2020 (before the start of the pandemic in most countries).

Uber's monthly downloads in 2023 were down 14% compared to January 2020. Meanwhile, its sessions have just reached pre-pandemic levels in 2023.

HEALTH & FITNESS

Health & Fitness Revenue Has Surged — What Demographics are Providing This Growth?

Consumer spend in Health & Fitness apps has surged across all genres since 2020. In the United States, average revenue per user more than doubled in four top subgenres including Weight Loss & Calories Tracker (\$1.13 monthly ARPU in 2023) and Women's Health (\$0.38).

Mental Health apps gained popularity during the pandemic and brought in more users, especially more female users. Women's Health and Mental Health apps gained revenue by focusing on expanding their user base in general which skews more female. Other subgenres relied on broadening their appeal to a wider audience and their gender split became more balanced as a result.

Develop user profiles based on demographics and user behaviors to guide future product improvements

Share of Health & Fitness Consumer Spend by Price on iOS

Share of Health & Fitness Consumer Spend by Subscription vs. One-Time Purchases on iOS

Source: data.ai Intelligence | Note: IAP SKU data is iOS only.

VIDEO STREAMING

Higher Prices and Subscriptions Improve Health & Fitness Monetization

As prices increased across a variety of industries in 2022 and 2023, Health & Fitness apps were no exception. Some of this increase came from raising prices, but others used their product loyalty to push annual subscriptions which improve retention and give apps more certainty about their revenue.

Not surprisingly, subscriptions are still the preferred in-app purchase option for most Health & Fitness apps. One-time purchases still take a significant share of consumer spend in some APAC markets like China, Japan, and South Korea.

Want to see which in-app purchases are driving revenue growth? Try [data.ai's IAP SKU](#)

Sports

Unmissable action: Sports TV apps tap into latent demand for live matches; Sports Betting expands in the US — opening a large lucrative market for mobile apps.

A Win for Sports Apps as Huge Growth Continues in 2023

Following a brief lull as live sports shut down at the start of the pandemic in 2020, the demand for sports apps came roaring back. Consumer spend climbed 23% year-over-year in 2023 to \$1.8 billion, more than double the total from back in 2019.

Live Sports still provided the bulk of consumer spending among sports apps. In terms of downloads, Fantasy Sports has taken off in recent years and Sports Betting continues to gain traction after it was legalized in the United States.

Sports app performance is highly dependent on seasons and events. See which leagues and events are driving growth by studying [weekly or monthly trends](#).

SPORTS

You Can Bet On It! Sports Apps Let Users Feel Like They are a Part of the Action

The legalization of sports betting in the United States has prompted a surge in adoption over the past three years. Sports Betting has now surpassed Fantasy Sports in terms of new downloads, reaching more than 12 million downloads in Q4 2023.

Fantasy Sports apps peak in the US at the start of National Football League season, while Sports Betting is highest in Q1 with March Madness and the Super Bowl as marquee events.

Globally, the surge in Fantasy Sports apps is largely due to their emergence in India, where fantasy cricket apps like [Dream11](#), [My11Circle](#), and [Howzat](#) are among the most popular Fantasy Sports apps in the world.

The most recent new competitor in the United States sports betting market came from sports giant ESPN, which launched [ESPN BET](#) in November 2023. Track its performance with [data.ai Intelligence](#).

DATING

Dating Apps Adjust to Post-Pandemic Behavior

Perhaps counterintuitively, Dating app usage surged at the start of the pandemic even as people were stuck at home. Dating apps provided a useful way for people to socialize, if not in person, on their mobile devices. A number of apps aimed at finding friends also emerged, including [Wizz](#), [Yubo](#) and [Wink](#).

Consumer spend growth has slowed in some key markets like the US and China as Dating behaviors continue to adjust to a post-lockdown world. Developing markets show more opportunity. Discover the state of the dating market in 2023: which apps are the best performers in terms of monetizing users and encouraging them to keep using the apps.

Ticketing Apps in Higher Demand Than Ever as Consumers Flock to In-Person Events

In-person events, which came roaring back in 2022, were even more popular in 2023. Global downloads hit a new high in Q3 2023 at 82.5 million, up 33% year-over-year and 77% from pre-pandemic Q3 2019.

With the red-hot demand for ticketing apps came fiercer competition. The share of downloads from paid channels trended up throughout 2023. By the end of the year, more than 12% of global Ticket Service downloads and 34% of US downloads came from paid search or in-app ads.

Customer Testimonial

"In the dynamic world of mobile gaming, SciPlay's rise epitomizes agility, strategic focus, and player-centricity. In 2023, we achieved elevated ARPPU, robust retention and impressive player-to-payer conversion, all attained by fine tuning our products and tailoring marketing campaigns to better align with players' needs and preferences. Market data, including data provided by data.ai, has played a critical role in shaping SciPlay's strategy by providing valuable insights into industry trends, consumer behavior and competitive landscapes. It serves as a foundation for informed decision-making, risk assessment, opportunity identification and understanding our current and future market position."

Noga Halperin
Chief Revenue Officer

"At Orange, we offer a wide range of mobile applications across our footprint in Europe and Africa. These apps are essential for our customers to access our services and engage with us. To continuously optimize every step of the conversion funnel, data.ai Intelligence helps us in benchmarking the market, getting inspired, and fine-tuning our apps. This is key for our growth strategy."

Jean-Pierre Combe
Head of Orange Mobile Apps

Customer Testimonial

"We mainly use data.ai for market research and competitor analysis. Among other things, data.ai is extremely useful in identifying emerging dating markets with global potential and benchmarking the effectiveness of our monetization strategy among our peers."

Benjamin Lorthiois
Chief Revenue Officer

"Launching a new game on the market, regardless of the category or size, continues to be very challenging. There is no recipe that guarantees success. It is essential to develop in-house structures that allow us to obtain and analyze solid data, as well as receive constant input from the market. Following best practices in the different fields mitigates risks and results in slow but steady growth."

Jeannie Odreman
Director Mobile Publishing

Customer Testimonial

"data.ai is a huge help for mobile game practitioners, allowing us to keep up with industry trends. With market size and business insight data, we can quickly understand global market trends and conduct in-depth comparative analysis with leading products."

Dongke Wang
Marketing Director

ONENT

"Since its launch in 2018, Dreame has been widely cherished by users worldwide. We are delighted to serve as advocates for online literature, creating a spiritual haven for enthusiasts and creators alike. Additionally, we have accompanied numerous writing enthusiasts on their journey to becoming professional authors. Outstanding content not only garners favor among local readers but also possesses the power to transcend borders, races, and languages. We are committed to building a diverse content ecosystem, continuing to inspire talented writers to create high-quality content and bring joy to literature enthusiasts."

Dreame

Customer Testimonial
